

## INDICT RICHESON ON FIVE COUNTS

Members of Suffolk Grand Jury  
Unanimous in Findings  
against Clergyman.

## TO SERVE WARRANT TO-DAY

Indictment Unique in Annals of  
Bay State Homicides—Is of  
the So-Called "Blank-  
et" Type.

Boston, Oct. 31.—The Rev. Clarence V. T. Richeson, pastor of Immanuel Baptist Church, Cambridge, was indicted on five counts charging murder in the first degree by the Suffolk county grand jury late today, for the poisoning on October 14 of his former sweetheart, Miss Avis W. Linnell of Hyannis. The grand jury reported its findings to Judge George A. Sanderson in the superior criminal court after hearing more than 30 witnesses during four days' consideration of the government's case. It is understood that the jurors were unanimous in ordering the indictment.

By the returning of this true bill the necessity of holding a hearing in the municipal court is obviated. In connection with this later proceeding, the Rev. Mr. Richeson appeared in the lower court, this having been the date set, following his arrest a week ago Friday, but the case was continued formally without action and the clergyman taken back to jail immediately. By a coincidence, today had been the anniversary of the marriage of Mr. Richeson and Miss Violet Edmunds of Brookline.

Somewhat hazy and pale after 31 days of incarceration in the Charles street jail, the minister stood in the dock with a score of other prisoners this morning and heard his case continued to November 7.

**MINISTER HAS LOST WEIGHT.**  
Despite the fact that he wore the same ministerial garb in which he appeared before in court, he was noticeably thinner before in court. He was noticeably thinner before in court. He was noticeably thinner before in court.

The indictment, which is said to be almost unique in the annals of Massachusetts homicides in which poisoning has figured, is of the so-called "blanket" type, the five counts being so worded as to permit the introduction of evidence by the government as to any of several methods by which the poison may have been conveyed to the dead girl.

As worded, the indictment indicates that the government has yet without knowledge of what means were employed to hand the poison to Miss Linnell and is uncertain also as to the exact form in which the poison was taken.

The fourth and principal count of the indictment goes on to say that Richeson gave Miss Linnell the poison, pretending to her as it was a medicinal preparation which would overcome her present condition, "said Richeson well knowing the same not to be such a medicinal preparation, but well knowing it to be a deadly poison."

**INVESTIGATION WAS THOROUGH.**  
Shortly after the grand jury had made its report, District Attorney Bates, who had directed the presentation of the evidence, said that he believed the grand jury was fully warranted in finding an indictment. "The investigation was as thorough as possible," the district attorney said.

Attorney Philip B. Dunbar, counsel for Richeson, declined to comment on the grand jury's action. It has been understood that Mr. Dunbar has in his keeping the resignation of Mr. Richeson as pastor of Immanuel Church, to be presented to the church in the event of the grand jury's returning a true bill.

Mr. Richeson requested the congregation to withhold any action on the matter until the grand jury reported, and the church last Friday voted to grant his request. Mr. Dunbar would not say tonight whether the pastor would resign.

The date of Mr. Richeson's trial is still tentatively set for early in January, but neither the district attorney nor Attorney Dunbar has said whether the trial will be held in the city or in Hyannis.

It was reported this evening that Attorney John L. Lee of Lunenburg, Va., a prominent criminal lawyer in the South, was on his way here to confer with the attorneys for the defense in connection with an offer of a retainer.

## PROFIT SHOWN IN POSTOFFICE

Uncle Sam Has Surplus of \$219,118 for First Fiscal Year since 1883.

Washington, Oct. 31.—For the first time since 1883 the postoffice department, during the fiscal year ending June 30, 1911, was conducted at a profit. In 24 months the conduct of the postal service has resulted in changing a deficit of \$17,479,770 for the fiscal year 1909 to a surplus of \$219,118 for the fiscal year 1911. During the last fiscal year the audited revenue of the department was \$237,879,923, and the audited expenditures \$220,680,805.

These facts are given in a report of Charles A. Kram, auditor for the postoffice department, in a report detailed by Postmaster-General Hitchcock today.

## SWIMMING THE CHANNEL.

A Gamble With the Tides and Winds—They Usually Win.  
(From the New York Sun.)

For several years three men have been conspicuous in trying to swim the English channel, a feat which Captain Mat Webb accomplished on his second attempt in 1897. T. W. Burgess, who succeeded recently, after being nearly twenty-four hours in the water, in reaching Cape Grizier from Dover, has been more persistent than his rivals, but Montagu Holbein and Jabez Wolfe have made so many brilliant efforts that to keep count of them is difficult. On August 6, 1907, Mr. Wolfe had to give up when only three-quarters of a mile from the French coast. Mr. Holbein entered the water on the French side at Cape Grizier August 12, 1909, at 5:45 p. m., swam all night, and began the day with high hopes of winning out on the beach at Dover, but eventually he had the same experience as every other contender, but Webb, Mr. Burgess, on one of his earlier swims, had within halting distance of the French coast, when the North Sea struck, and he was forced to turn back.

Swimming the channel turns upon the question of taking the tide, and "beating" the contending tides from east to west and east to east as they swirl through the strait. If it were only a matter of distance there are probably 100 men in England, a country of strong swimmers, who could cross from Dover to the cape between Calais and Boulogne. The channel is a narrow strait, flowing in from the North Sea and from the Atlantic simultaneously, and ebb in the same way. About where the rising tides meet a stream is formed—the intermediate stream, it is called. It runs at first with what is called the channel stream and turning, runs with the North Sea stream. High tides are often very high, sometimes forty feet. High winds also prevail in the strait, in which the water is always in motion one way or the other. It is said to be never calm. A swimmer may make the most calculations to take the tide, but he cannot escape the fact that the tide is always in motion one way or the other. It is said to be never calm. A swimmer may make the most calculations to take the tide, but he cannot escape the fact that the tide is always in motion one way or the other.

The truth is that swimming the channel is a gamble with the tides and winds. An unusually high tide driven by a strong wind has sometimes set at night, the efforts of the swimmer when his face could be distinguished from the shore toward which he was struggling. To realize what endurance is required to make the attempt, it is not difficult to understand that the water is not only often rough, but always cold, even in midsummer. Nourishment or stimulants are needed by the swimmer every two or three hours, and his body must be well clothed. Only a powerful, full-blooded man in perfect physical condition can attempt to swim the channel. It is one of the greatest feats of endurance even to fall repeatedly. Mr. Burgess will be envied by Messrs. Wolfe and Holbein, but doubtless they will continue to struggle with the tides in the strait, having faith that the tide will turn and they will have the same luck that made the success of the Yorkshireman possible.

## GOLD HUNTERS DISBAND.

Surviving Handful of Forty-niners Say Last Farewell.  
(From the Technical World.)

The last of the Forty-niners have said farewell. The surviving handful of old men who, after the long journey over plains, mountains and the desert, or the sea, or the sea voyage around Cape Horn, met at Evanston, Ill., September 14 and formally disbanded their organization.

There were one hundred and fifty of the California argonauts when they formed the Western Association of California Pioneers in 1889. So far as the records show only twenty of these are alive today, and of this number but twelve were able to attend the final gathering. One of these, L. Murray Perkins, came all the way from Baxter Springs, Kan., and to spend the last days of his life in the trip in a modern sleeper as more arduous than the one over the same ground in a prairie schooner more than sixty years ago.

The pioneers of forty-nine were, perhaps, the forerunners of the spread of the United States westward, and as such have each one his own history. It was these devoted gold-seekers who first blazed the trail across the plains and brought the East into actual contact with the West. Others had preceded them, it is true, but in a large measure they were responsible for the quickness with which the western country was colonized and opened up for the more safe traveling of the public and the fortune-seeker. It was in their trail and because of their being in the western country that the great gold fields were discovered. The trail which they made across the western trail which the Golden Gate was strewn with the bones of the caravans, who, attacked by the Indians, were overwhelmed and massacred.

Tests were pitched in the yard of the hotel of the association, Mr. Holbein, who, in his youth, and as such have each one his own history. It was these devoted gold-seekers who first blazed the trail across the plains and brought the East into actual contact with the West. Others had preceded them, it is true, but in a large measure they were responsible for the quickness with which the western country was colonized and opened up for the more safe traveling of the public and the fortune-seeker. ## PAVING WAY FOR AMERICAN POPE

Great Significance Attached to  
Pope's Act in Granting U. S.  
Four Representatives.

Rome, Oct. 31.—Comments on the approaching consistory, at which 17 cardinals will be created, continue to emphasize the great significance of Pope Pius X's decision to grant four representatives in the Sacred College to America. It is asserted that the way is being paved for the advent of an American Pope.

They point out that the largest aggregation of Catholics in the world is to be found in the United States and its possessions—the Philippine Islands, Hawaii, Porto Rico and Guam. Not only are the Catholics of America superior in numbers, but also in deep religious feeling, loyalty to the Holy See and in wealth and generosity. An Irish-American Pope is suggested for the day when it shall be considered no longer necessary for the papacy to be held by an Italian.

The faculty and students of the American College are rejoicing especially over the elevation of Archbishop Farley of New York and Archbishop O'Connell of Boston, as these prelates are alumni of the college in America, and a strong national feeling is being aroused. The original 12 students when the college was founded by Pope Pius IX, Archbishop O'Connell was both a student and a rector and is the first rector to be raised to the cardinalate.

The elevation made by some that Monsignor Kennedy, of the American College, being in America, and a strong national feeling is being aroused. The original 12 students when the college was founded by Pope Pius IX, Archbishop O'Connell was both a student and a rector and is the first rector to be raised to the cardinalate.

It is reported that Monsignor Saurat, of the American College, being in America, and a strong national feeling is being aroused. The original 12 students when the college was founded by Pope Pius IX, Archbishop O'Connell was both a student and a rector and is the first rector to be raised to the cardinalate.
